Projects

- **Automated MCQ Generator using NLP and AI** *Flask, spaCy, Python, Google AI, Render*
 - Built a web-based system to generate exam-style MCQs from PDFs, text files, and Google Drive links.
 - Implemented two modes: manual NLP-based MCQ generation and AI-assisted MCQ generation.
 - Used spaCy for sentence segmentation, noun extraction, and explainable MCQ formation.
 - Designed offline text summarization to reduce token usage before AI processing.
 - Added cost-aware AI limits by restricting MCQ generation to a maximum of 15 questions.
 - Implemented answer reveal on user interaction and downloadable PDF output.
- **E-Commerce Website** *EJS, MongoDB, Express, Passport.js*
 - Developed a full-stack e-commerce platform with separate seller and user accounts.
 - Implemented secure authentication and authorization using Passport.js.
 - Built product CRUD features and inventory management for sellers.
 - Designed RESTful APIs and used MongoDB for structured data storage.
